PROFESSIONAL SUMMARY

Results-driven Software Developer with 2.5+ years of experience in full-stack development and payment integration systems. Proven expertise in designing, developing, and optimizing scalable applications while collaborating with cross-functional teams. Passionate about creating innovative solutions that enhance financial transactions and improve business efficiency. Adept at leading teams, streamlining system architectures, and resolving critical production issues.

EXPERIENCE

Blazeclan Technologies   Pune, Maharashtra
Developer   *01/2023 – Present*

- Integrated 50+ Payment Providers: Spearheaded the integration of over 50 payment providers into Optty's universal payment platform, a system designed to streamline cross-border payments for businesses in multiple regions and currencies. Delivered all integrations within specified timelines, enabling seamless payment processing worldwide.
- Directed a team of six developers to successfully integrate major payment services such as Square, Stripe, Adyen, and Fiserv resulting in a 30% business growth.
- Designed and implemented a wallet management system, increasing user engagement by 40% on the admin portal.
- Developed multiple Proof of Concepts (POCs) and comprehensive technical documentation to streamline payment provider integrations.
- Spearheaded the Pay-to feature integration, facilitating account-to-account transactions and driving a 15% revenue increase.
- Optimized system performance by reducing API calls, cutting order creation time by 50%, and improving operational efficiency.
- Worked as part of the production team to resolve critical production issues ensuring uninterrupted service.

Blazeclan Technologies   Pune, Maharashtra
Clan Fellow - Intern   *06/2022 – 12/2022*

- Played a pivotal role in developing and deploying Blazeclan's Employee Onboarding Portal, streamlining the onboarding process
- Gained hands-on experience with Cloud Technologies, MERN Stack, MEAN Stack, and Agile methodologies.
- Trained in Sprint Planning, Jira, Confluence, and Release Management to improve project efficiency.
- Developed a Reflective Journal application, implementing user authentication, blog publishing, and category-wise blog management using the MERN stack
- Designed and built a CI/CD pipeline from scratch, automating the build and deployment of a web application.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript
Backend Technologies: NestJS, PostgreSQL, TypeORM, Sequelize, Mongoose, Node.js, Express.js
Frontend Technologies: React, Next.js, HTML, CSS
Cloud & DevOps: AWS, GCP, Docker, CI/CD, Git
Tools: Jira, Confluence, Figma, Draw.io

EDUCATION

MIT Academy of Engineering, B.Tech   Pune, Maharashtra
GPA 7.6   *08/2018 – 05/2022*

AWARDS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- Excellent Performer of the Year 2024-25
- Best Project of the Year 2024-25
- Quarterly Value Award for Disagree and Commit
